Our program is **unique in the market**, that's why we are the **fastest growing** comp MGA.

35%

Decrease in Claims
Frequency

87%

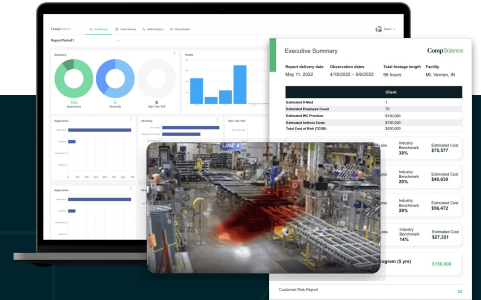

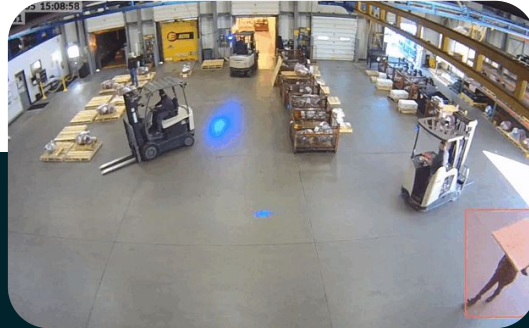

Program Adoption

51%

Win Rate

We give brokers **an edge**.

Our privacy-safe system generates proprietary risk factors from **50+ behavioral and environmental hazard detectors** to generate a safety report

1

Share a sample of existing video footage from your facility

2

Apply artificial intelligence to detect hazards

3

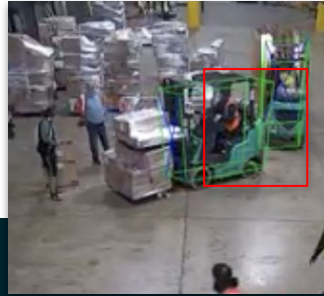

Prioritize issues, prevent accidents and reduce losses

Our system detects the hazards that correspond to **over 96% of workplace injuries.**

Ergonomics

- Manual Material Handling
- Awkward Postures
- Work Cycles
- Environmental
- Overexertion

Struck By

- Powered Equipment Operation
- Traffic Patterns
- Elevated Objects
- Material Handling Equipment
- Speeding

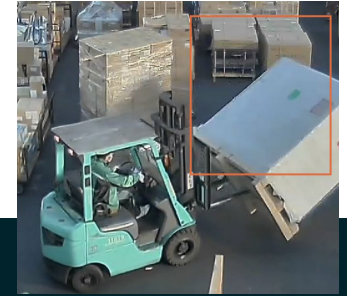

Slip / Trip / Fall

- Housekeeping
- Obstructed Vision
- Unprotected Leading Edges
- Floor Maintenance
- Ladders & Lifts

Caught In

- Machine Guarding
- Pin Hazards
- Pinch Points
- No Lockout Used
- Crawling Under/Climbing Into

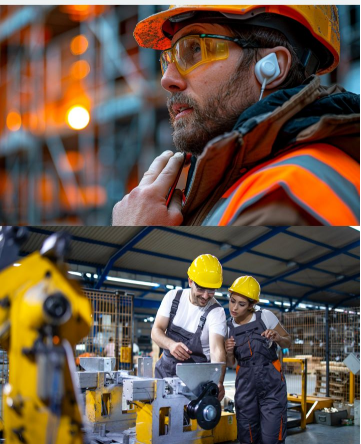

Damage

- Cargo Falling
- Precarious Load
- Spill
- Throwing Objects
- Facility Damage

We don't just flag SIFs, **we track the unreported incidents, near misses, and noncompliance events** that eventually lead to serious claims.

Welcome to your journey towards a safer workplace with CompScience. Engaged customers like you typically see a 35% reduction in injury rates, resulting in a more loyal and productive workforce. Together, we can create a safer environment for everyone.

Loss Control Onboarding Call

- Schedule meeting and ensure proper attendees can attend. Participants:
- Review program details, set goals and expectations and discuss video upload. Participants:

First Risk Report
